

1.

Install Apache web server on your Linux system and verify the installation by accessing the default Apache welcome page from your browser using localhost.

Ans : **Install Apache**

sudo apt update

sudo apt install apache2 -y

sudo systemctl start apache2

sudo systemctl enable apache2

Open in browser:

http://localhost

You should see the **Apache Default Page**.

2.

Change the default Apache web server homepage by editing the index.html file in /var/www/html to display your name and favorite IPL team.

Ans : **Change Default Homepage**

Edit:

sudo nano /var/www/html/index.html

Example:

<h1>Bharat Badgujar</h1>

<h2>Favorite IPL Team: Mumbai Indians</h2>

Save and refresh:

http://localhost

3.

Configure a custom virtual host in Apache for a new domain called myzomatoclone.local that serves files from /var/www/myzomatoclone and test it by updating your /etc/hosts file.

Ans : **Create Virtual Host**

Create website folder:

sudo mkdir -p /var/www/myzomatoclone

```
echo "<h1>Welcome to My Zomato Clone</h1>" | sudo tee /var/www/myzomatoclone/index.html
```

Create virtual host:

```
sudo nano /etc/apache2/sites-available/myzomatoclone.conf
```

Add:

```
<VirtualHost *:80>
```

```
    ServerName myzomatoclone.local
```

```
    DocumentRoot /var/www/myzomatoclone
```

```
</VirtualHost>
```

Enable it:

```
sudo a2ensite myzomatoclone.conf
```

```
sudo systemctl reload apache2
```

Edit hosts file:

```
sudo nano /etc/hosts
```

Add:

```
127.0.0.1 myzomatoclone.local
```

Test:

```
http://myzomatoclone.local
```

4.

Enable and test the Apache `mod_rewrite` module by creating a rule that rewrites requests from `/foodie` to `/index.html`, then verify it works in your browser.

Hint: Use the `a2enmod` command and edit the `.htaccess` file in your web root.

Ans : **Enable mod_rewrite**

Enable module:

```
sudo a2enmod rewrite
```

```
sudo systemctl restart apache2
```

Create `.htaccess`:

```
sudo nano /var/www/html/.htaccess
```

Add:

RewriteEngine On

RewriteRule ^foodie\$ /index.html [L]

Test:

<http://localhost/foodie>

It should open **index.html**.
